

# Mineral Occurrences and Investment Opportunity in the Southern Nations, Nationalities and Peoples

## Regional State

Some Investigation shows that there are different types of precious Minerals in different parts of the region such as

Constriction Materials Potentials

Gold, Coal, white and red stone, Ignimbrite, Volcanic ash, and black sand, granite, lignite, carbonic shell.

Ben tonight, limestone, diatomite, coalmine and marble

Mineral water and others

So The Regional State is pleased to invite domestic and international investors who want to invest in Mining activity. For more details information, you can see the following tables;

| No | Type of Minerals         | Locations         | Estimated Reserve (KG/M <sup>3</sup> ) | Type of activities to be conducted |
|----|--------------------------|-------------------|--|------------------------------------|
| 1  | Gold and Precious stones |                   |  |                                    |
|    | - Gold                   | - Bench Maji      | - 3249(Kg)                             | - Exploration/ Exploitation        |
|    |                          | - Sidema          | - Not yet known                        | - Exploration/ Exploitation        |
|    | Gemstones                |                   |  |                                    |
|    | - Opal                   | - Konso, Burji    | - Not yet known                        | - Exploration/ Exploitation        |
|    | - Amazonite              | - Konso           | - Not yet known                        | - Exploration/ Exploitation        |
|    | - Jade                   | - Konso           | - Not yet known                        | - Exploration/ Exploitation        |
|    | - Oliver                 | - Guraghe         | - Not yet known                        | - Exploration                      |
| 2  | Industrial Minerals      |                   |  |                                    |
